A small team with broad reach. The team's 37 publications are **8.1% of the Education practice's output** but account for **32% of all its downloads** — about **5,913 downloads per publication**, roughly **3.9×** the practice average (1,497). They include the **two most-downloaded publications in the entire Education practice** — **5 of its top 10**, including **4 of the top 5**.

Where our work is read · reader geography (WB Documents)

Top reader country	%
United States	46.9
Peru	6.9
Mexico	5.5
Chile	2.8
China	2.7
Colombia	2.6
Singapore	2.4
Argentina	2.0

- **26% read within Latin America & the Caribbean** — Peru is the #2 reader worldwide — a regional audience few World Bank publications reach.
- **53% of downloads are of the Spanish-language versions** (44% English) — the team reaches Spanish-speaking readers across the region.
- The **US & other high-income** countries account for **47%**; the work also travels worldwide, into 223 countries.

Downloads by reader country (darker = more) · few → many, log scale · grey = no recorded downloads. Covers **all 37 publications** — the geolocated portion of the team's 218,776 downloads (the AI & Digital series is part of, not all of, this audience).

How we compare across the Education Global Practice · 10 teams, ranked by downloads per publication

Education team	Publications	Downloads	Per pub.	% of dls	Read in
Latin America & Caribbean	37	218,776	5,913	32.2%	Spanish (53%)
Western Africa 3	12	26,814	2,234	3.9%	English (89%)
East Asia & Pacific	14	31,201	2,229	4.6%	English (96%)
Eastern Africa 1	13	27,356	2,104	4.0%	English (83%)
Middle East & N. Africa	10	18,918	1,892	2.8%	English (99%)
Europe & Central Asia	16	20,270	1,267	3.0%	English (90%)
Global (HEDGE)	296	316,033	1,068	46.5%	English (89%)
South Asia	14	7,299	521	1.1%	English (89%)
Eastern Africa 2	27	9,023	334	1.3%	English (89%)
Western Africa 2	15	4,093	273	0.6%	English (93%)

Reading the table. Ranked by downloads per publication, LAC is first by a wide margin — **5,913** versus the practice average of 1,497 and the next-best team's 2,234, and it earns the **2nd-highest total downloads** of any of the ten teams (behind only the global HEDGE team, which publishes about **8× as many** publications). It also **stands alone on language**: LAC is read **mostly in Spanish (53%)** while every other team is read **83–99% in English** — reaching a Spanish-speaking audience the rest of the practice does not. In all, the team turns the smallest substantive output into outsized reach: **8% of publications, 32% of downloads**.

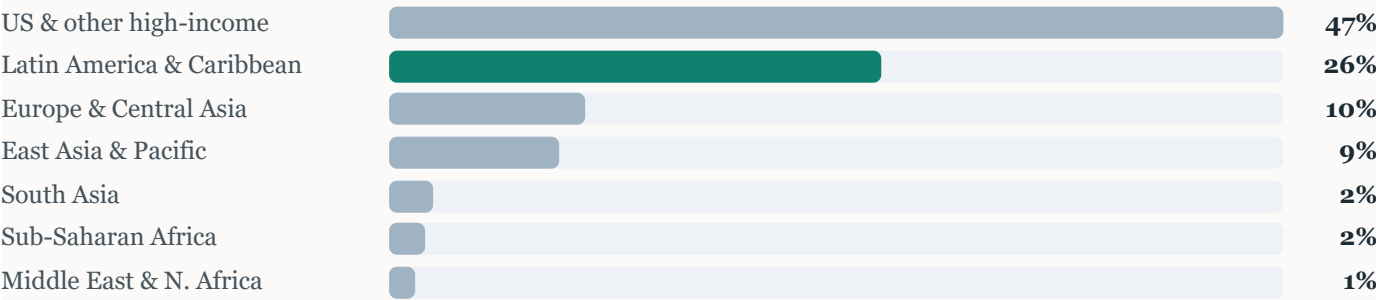

How we compare within LAC Human Development · Education · Health · Social Protection

LAC HD practice	Publications	Downloads	Share	Per pub.
Education	37	218,776	56.8%	5,913
Health	18	125,059	32.4%	6,948
Social Protection	24	41,614	10.8%	1,734
All three (LAC HD)	79	385,449	100%	4,879

Within LAC. Education is the **largest** of LAC's three human-development practices, on both total downloads and breadth (37 publications). Health's downloads-per-publication look higher, but that is almost entirely one Colombia report — *Invertir en una Longevidad Saludable* — which is ~85% of Health's total and read 95% inside Colombia; set it aside and Education has comfortably the deepest, most widely-read portfolio of the three.

LAC Education is shown on its full reconciled basis (37 / 218,776). Health & Social Protection are counted from the document database only and may be missing some publications the same way LAC Education's blank-owner items were — treat them as lower bounds.

Where our readers are, by world region · share of the team's geolocated downloads

A regional reach few teams have. Most World Bank education teams are read overwhelmingly from the US; LAC is the exception — **26% of its readers are within Latin America & the Caribbean** (Peru is its #2 reader worldwide), while it still reaches the US and a global audience across 223 countries.

The Digital & AI Innovations series · 8 of the team's publications

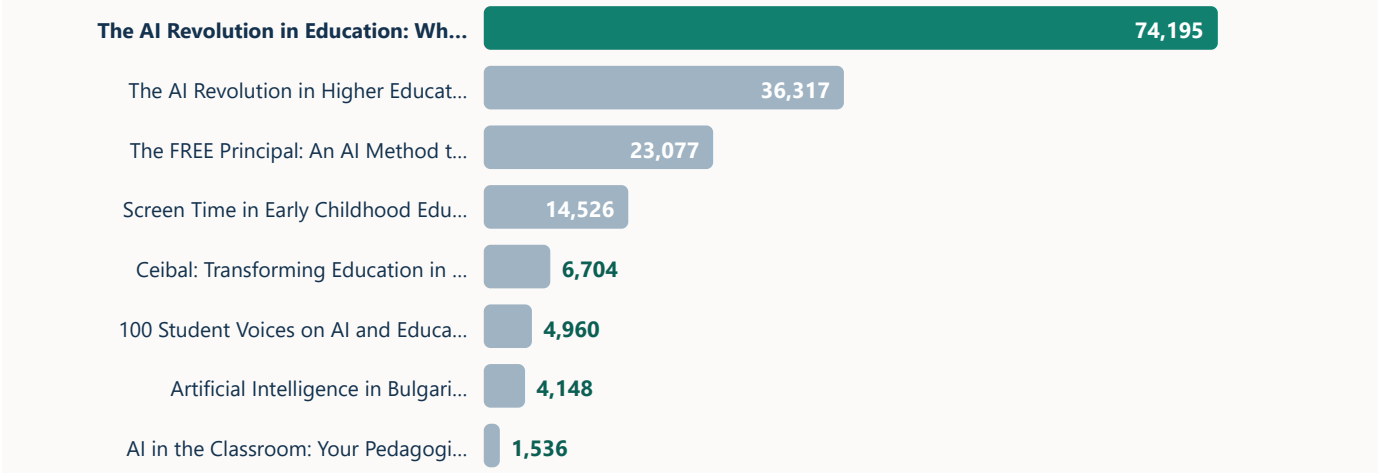

Eight of the team's publications form the AI-in-education series. Together they account for **165,463 downloads** — and a large share of the team's reach.

The same 8 publications, as a share of three reference sets (these are not nested).

The engine of the team's reach. These eight publications are **76% of everything the team has published** and **24% of the entire global Education practice**. The flagship — *The AI Revolution in Education* (74,195) — is the single most-downloaded product in the practice. Yet it is not a one-hit story: each AI publication averages **20,683 downloads** (vs the practice norm of 1,497), and five of the eight clear that average several times over.

The eight publications, by downloads

AI in the Classroom: Your Pedagogical Ally ↗	1,536
Total — 8 publications	165,463

Reach beyond the series. Even setting the AI series aside, the team's other **29 publications** account for **53,313 downloads** across more than 200 countries — the team's depth extends well past AI. The series itself is read in 211 countries, 54% in Spanish, and holds three of the practice's five most-downloaded products. Interactive detail: ezequielmolina-lang.github.io/wb-downloads-dashboard/index.html.

Methodology & contact

Sources. Downloads are read from both World Bank repositories — WB Documents (documentos.bancomundial.org) and the Open Knowledge Repository (openknowledge.worldbank.org) — and summed across every language version of each publication, for publications with a document date in 2024–2026. **Reader geography** is from WB Documents (~99% of its downloads are geo-located; OKR downloads are not); “United States & high-income” is the World Bank's residual region grouping, here almost entirely the US. This is the team's **fully-reconciled** set of 37 publications / 218,776 (it adds publications whose owner field was blank in the database, recovered from the team's work-program list, plus exact OKR counts). In the 10-team comparison, **Eastern Africa 1** includes *Africa's Pulse No. 30* — an Africa-region flagship — counted under that team because its **lead author is a member of it**. Figures refresh about every 2 months; last checked **12 June 2026**.
