► **For more information** — the full interactive dashboard, with every publication searchable and filterable by group, language and AI/digital: ezequielmolina-lang.github.io/wb-downloads-dashboard/hd-digital-ai.html

A global, bilingual readership. The set reaches **245 countries**. Roughly half of downloads come from the **United States & other high-income** countries (49%), but the work also travels widely into **East Asia & the Pacific** (15%) and, unusually for technical work, **Latin America & the Caribbean** (14%) — where **Peru is the #3 reader country in the world**. It is read in **English (75%)** and, to a degree rare for World Bank research, **Spanish (22%)**.

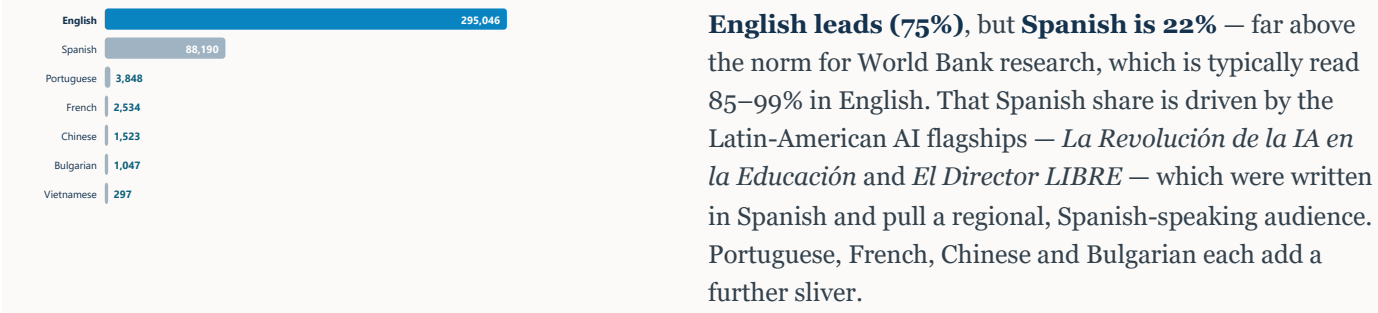

Where readers are · share of geo-located downloads (WB Documents)

Reading the map. Downloads concentrate in the United States (48% on its own) and across East Asia (China, Singapore, Vietnam, India). The Latin American cluster — Peru, Mexico, Chile, Brazil, Colombia, Argentina — is what sets

this set apart: a large Spanish-speaking audience that most Bank technical series do not reach.

In what languages · geo-located downloads by publication language

What they read · by Human-Development group

Group	Publications	Downloads	Share
Education	124	274,100	63.2%
Social Protection	67	106,064	24.5%
Health	33	40,201	9.3%
HD (cross-cutting)	2	13,381	3.1%
All Human Development	226	433,746	100%

AI is a small share of the catalogue but most of the reading. Only **34 of 226 publications** name AI in the title — yet they account for **223,686 downloads, 52% of the whole set**. Education produces most of it; Social Protection's share is the fastest-growing (future-of-work, AI & jobs, digital cash transfers).

Method. The Digital & AI theme is found by scanning every 2024–2026 Human-Development publication title for digital/AI terms (multilingual, broad). Downloads combine the two World Bank repositories (WB Documents + Open Knowledge Repository); reader geography and language are from WB Documents (~99% geo-located). Health, Social Protection & cross-cutting counts are lower bounds. Interactive detail and every publication: ezequielmolina-lang.github.io/wb-downloads-dashboard/hd-digital-ai.html.
